

CIC Eyewear Manufacturer Limited

Premium acetate and combo eyewear manufacturing since 2005. Trusted by leading brands worldwide with exceptional quality, innovative design, and reliable production capabilities.

About CIC

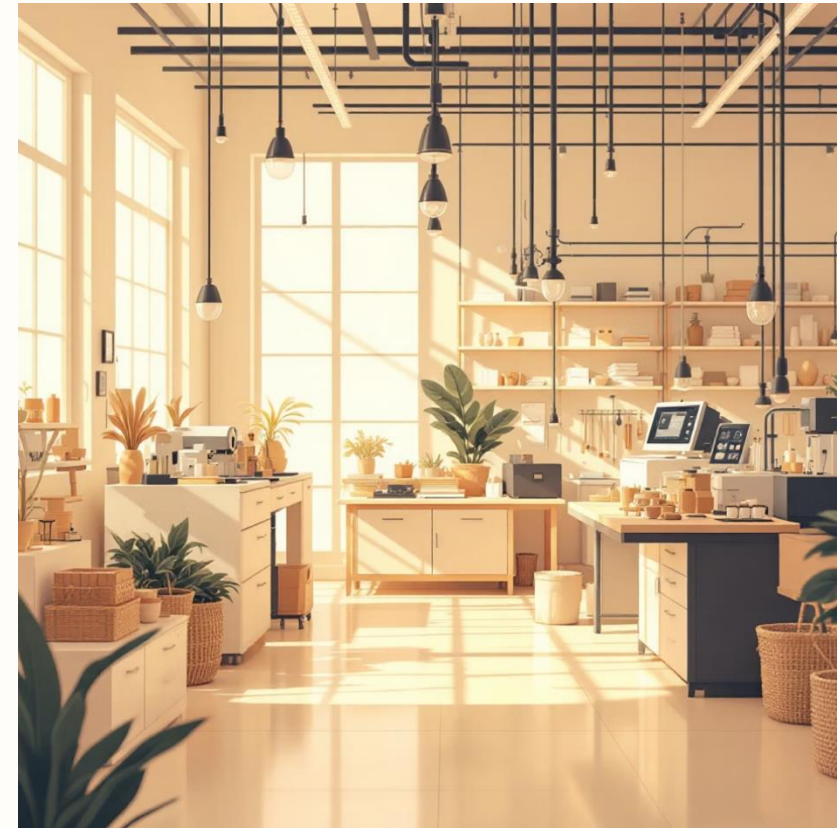

Company Foundation & Excellence

Founded in 2005, CIC has established itself as a distinguished leader in premium acetate and combo eyewear manufacturing. Our state-of-the-art production facility, Heyuan Lixin Optical Products Co., Ltd, represents the pinnacle of modern eyewear manufacturing technology and expertise.

Located in Heyuan's High-Tech Industrial Development Zone, our facility operates two major acetate production lines with a dedicated workforce of 450 skilled employees, delivering an impressive monthly capacity of 180,000 acetate frames.

Quality Certifications & Compliance

Our commitment to excellence is validated through prestigious certifications including **ISCC**, **BSCI**, **ISO9001**, and **ISO 14001**. These accreditations, combined with our fire protection, environmental protection, and emission certificates, demonstrate our unwavering dedication to quality, safety, and environmental responsibility.

Leadership Structure & Organization

Executive Leadership

President: Mr. Wang Daomin

Vice President & Co-Founder: Edward Chiu

Operations Departments

- Sales Department
- Design Department
- Quality Control Department
- Engineering Department

Support Functions

- Production Department
- HR & Administration
- Accounting Department
- Purchasing Department

Our organizational structure reflects our commitment to operational excellence through specialized departments that work in harmony to deliver superior eyewear products. Each department operates under experienced leadership, ensuring seamless coordination from design conception through final delivery.

Manufacturing Operations Structure

Multi-Facility Production Excellence

Our manufacturing operations span two strategically located facilities under the visionary leadership of President Mr. Wang Daomin and Vice President Edward Chiu. This dual-facility approach maximizes production efficiency while maintaining our exacting quality standards.

01

Heyuan Factory

Specialized facility focusing on advanced production techniques and quality control processes

02

Thailand Factory

Set up in June 2025

Specialized facility focusing on advanced production techniques and quality control processes

Expert Teams Driving Excellence

Design Team Innovation

Our six-member in-house design team serves as the creative powerhouse behind our unique eyewear solutions. With rapid CAD drawing completion in just **3-4 working days**, we ensure seamless collaboration and swift integration of customer feedback throughout the design process.

Quality Control Excellence

Our QC team maintains uncompromising standards through rigorous testing protocols. We randomly select 2 boxes (20 pieces per SKU) from each carton, conducting comprehensive tracer tests, bench alignment checks, and surface finishing evaluations before final shipment approval.

Engineering & Sampling Power

Our engineering capabilities span all materials – acetate, metal, and titanium. We produce **300 acetate samples monthly** with 20–45 day lead times, plus 50 metal/titanium samples with 45–60 day turnaround, ensuring rapid prototype delivery.

Advanced Production Technology

Our state-of-the-art facility features air-conditioned production lines with LED lighting, automatic material cutting, temple milling, CNC machines, and automated wire shooting systems, delivering unparalleled precision and consistency.

Production Capabilities & Performance

180K

Monthly Capacity

Acetate frames per month with consistent quality standards

2.4M

2021 Total Output

Frames delivered to satisfied customers worldwide

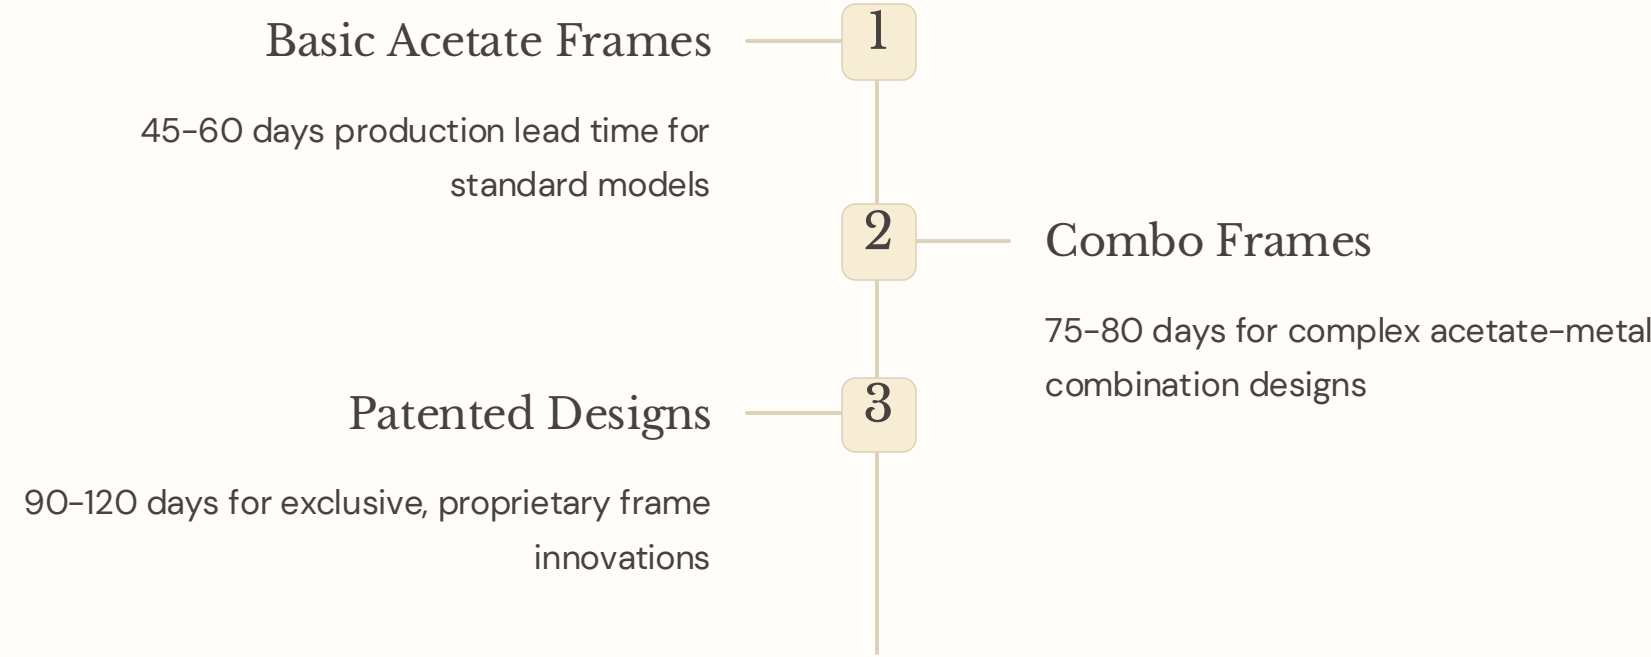

300

New Order MOQ

Pieces per model, 100 pieces per color variation

Production Timeline Excellence

📄 **Specialized Production Lines at Heyuan Facility** 3rd floor handles basic models, and 5th floor operates as a customized line for core clients.

Product Portfolio

- **80% Optical Frames** – Prescription eyewear excellence
- **20% Sunglasses** – Premium sunglass production
- **Materials:** Acetate, Metal, and Titanium

Trusted Partners: Warby Parker, Safilo, Pairs

Heyuan Production Facility Showcase

Our Heyuan facility represents the pinnacle of modern eyewear manufacturing, featuring advanced production lines, precision equipment, and optimized workflows that ensure consistent quality and efficiency.

Manufacturing Excellence in Action

Each production area is strategically designed for optimal workflow efficiency, featuring climate-controlled environments, advanced lighting systems, and precision machinery that maintains the highest standards of eyewear production.

Our facility showcases the perfect blend of traditional craftsmanship and cutting-edge technology, ensuring every frame meets our exacting standards while maintaining efficient production timelines.

Social Responsibility & Compliance Excellence

BSCI, SCSA, and Verite Audit Certifications

At CIC, our commitment to **social responsibility and labor rights** extends far beyond compliance – it's fundamental to our corporate values and operational philosophy. We maintain rigorous standards that protect our workforce while fostering a positive, sustainable manufacturing environment.

Overall Assessment:
This announced annual audit was carried out by SCSA auditor Fuh Yu on MAY 31, 2022 to assess the factory's operation against the client's requirements and respective local legislations on a sampling basis. The audit process consists of the opening meeting, management interviews, factory tour, confidential worker interview and closing meeting with factory management.

During the opening meeting, the scope, purpose and procedure of the audit was explained in detail to factory management. Auditor also highlighted the importance of transparency and authenticity of records to the factory management. SCSA's integrity policy was explained to factory management and the integrity letter was acknowledged and signed by the factory management.

Shenzhen Fuheng Eyewear Manufacturer Company Ltd is situated at RM 20H-26L, 2F, Tai De Jian Bldg, 381 Ai Nan Rd, Longgang St, Longgang District, Shenzhen, China. The factory established in 2016 and the total area of facility was at approximately 2100 square meters.

In view of facility, the factory consists of 2/2 of one block of 6-story production building. The management reported that they did not provide dormitory for workers.

Factory employed a total of 96 employees including 11 non-production employees. Factory specialized in producing "glasses". Per factory information, the peak season was not apparent and the approximate monthly capacity is reported to be at 40,000 pairs per month.

General Facility Information

Product manufactured: Eyeglass Frames
 Production capacity: 40,000 pairs per month
 Percentage of total production for export: 100%
 Other work existing in the facility: No information was provided on business verification
 Peak season: December to January
 Factory account: BSCI 2021
 Facility and building type: Industrial
 Total facility surface area: About 1,400 square meters
 Production building: The facility has rented the 2nd floor of 1-story production building (No.22) in Juyi 2nd Road High Tech Industrial Park
 Warehouse area: About 1,400 square meters
 Warehouse building: The facility has rented the whole 6th floor of a 6-story dormitory building as workers' dormitories
 Warehouse area: About 140 square meters
 Worker and size of warehouse: The warehouse is located in the 5th floor of production building, it is about 800 square meters
 Production activities: 24H working, morning long-form base forming, night machine base forming, Packing & Packing
 Equipment used: The facility has used main machines as follows:
 34 sets of semi-forming machines, 40 sets of forming machines for leg of glasses, 18 sets of software leg machines, 40 sets of center machines, 18 sets of grinding machines, 2 sets of slitting machines and 3 sets of thermo-printing machines.

Business Register No.: 91440300MA5D2279
 Compliance certifications: ISO 9001, ISO 14001, ISO 13952, ISO 13953, ISO 13954
 Other information for the facility: None

Annual BSCI Certification

Comprehensive annual audits validate our commitment to ethical business practices, worker safety, and environmental stewardship across all operations.

Labor Rights Protection

Strict adherence to international labor standards ensures fair wages, reasonable working hours, and safe working conditions for all 450 employees.

Sustainable Operations

Environmental protection initiatives and sustainable manufacturing practices demonstrate our responsibility to future generations and global communities.

Third-Party Verification: Independent audits by BSCI, SCSA, and Verite provide transparent validation of our social and environmental compliance, ensuring accountability to all stakeholders

CIC Thailand Project Overview

In response to the recent U.S. tariff challenges, CIC has strategically expanded with a new state-of-the-art production facility in Thailand to mitigate tariff risks and strengthen supply chain resilience. Officially completed in June 2025, this facility is dedicated to producing premium acetate products, reinforcing our commitment to excellence and innovation.

With dual production centers now in place, CIC offers our global partners a robust and flexible supply chain solution, ensuring stability, efficiency, and continuity in an increasingly complex trade environment.

Project Overview

CIC Excellence in Eyewear Manufacturing

With over 13 years of proven expertise in premium acetate eyewear manufacturing, CIC stands as a trusted partner to leading global eyewear brands. Our reputation is built on precision, reliability, and an unwavering commitment to quality at every stage of production.

Dual Production Centers

Strategic facilities in China and Thailand serving global markets efficiently

Proven Track Record

13+ years manufacturing premium acetate frames for world-class brands

Quality Commitment

Innovation and customer satisfaction at every stage of production

Strategic Production Allocation

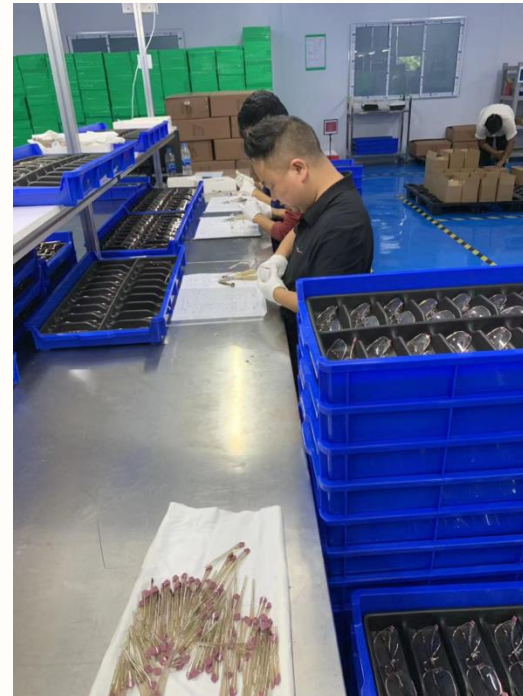

To maximize efficiency and deliver optimal value to our partners, CIC has strategically positioned our Thailand facilities as a key hub for large-scale, high-volume production. This enables us to provide cost-competitive solutions for bulk orders while maintaining uncompromising quality standards.

Meanwhile, our China facilities remain dedicated to handling complex, high-precision designs and serve as our core innovation and technology center. Partially processed products from China can be seamlessly finalized in Thailand, ensuring flexibility and efficiency across both sites.

This dual-center strategy balances cost optimization with technological excellence, creating a resilient, transparent, and client-aligned production ecosystem designed to support long-term growth and competitiveness.

Facility Expertise & Track Record

CIC proudly launched its Thailand acetate production in June 2025, marking a significant milestone in our global expansion strategy. The facility is managed by our highly skilled Chinese CIC production team, bringing years of specialized expertise to ensure world-class quality and efficiency in every stage of manufacturing.

We are honored to serve numerous leading clients internationally, with our growing portfolio reflecting the industry's strong trust in CIC's capabilities. This success reinforces our position as a reliable, innovative, and forward-looking partner in premium eyewear production worldwide.

"Our Thailand facility combines proven expertise with strategic location advantages to deliver unparalleled value to our global partners."

Production Capacity & Growth

150K

3X

Current Monthly Capacity

Target Capacity by Mid-2026

Growth Multiple

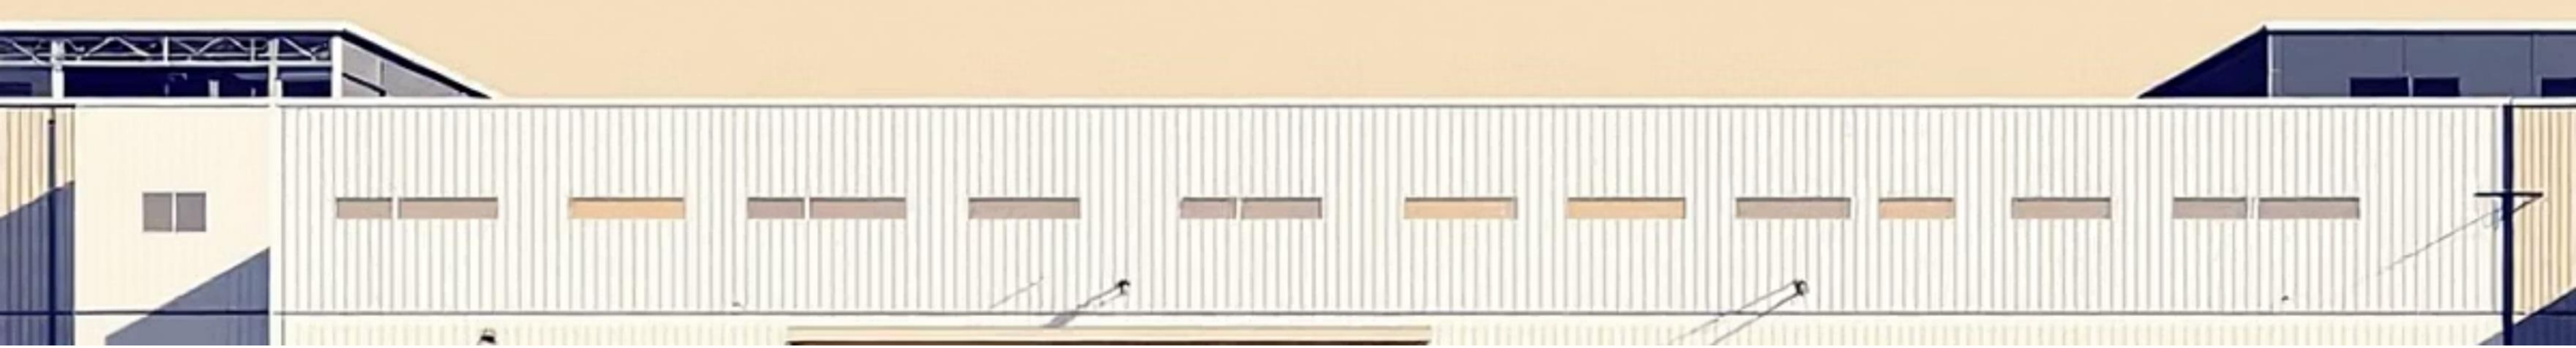

Pieces per month at our Thailand facility

Triple output with planned expansion

Scalable infrastructure ready for rapid expansion

The Thailand facility currently operates at **50,000 pieces per month**, with plans to triple output to **150,000 pieces per month by mid-2026**. With reserved land and facility resources, we are fully equipped to scale rapidly for new projects or increased demand, reinforcing our competitive edge in the global marketplace.

Strategic Advantages

Why Our Thailand Facility Stands Out

1

Prime Location

Strategic positioning provides easy access to global shipping routes, enabling faster delivery times and reduced logistics costs for international markets.

2

Skilled Workforce

- Specialists in acetate frame production
- Engineers in R&D and technical innovation
- Dedicated quality control professionals

3

Flexible Production

Versatile manufacturing capabilities spanning from niche collections to large-scale production runs, adapting to diverse client requirements.

4

Full Compliance

Operations fully aligned with international eyewear manufacturing standards including CE, ANSI, and JIS certifications.

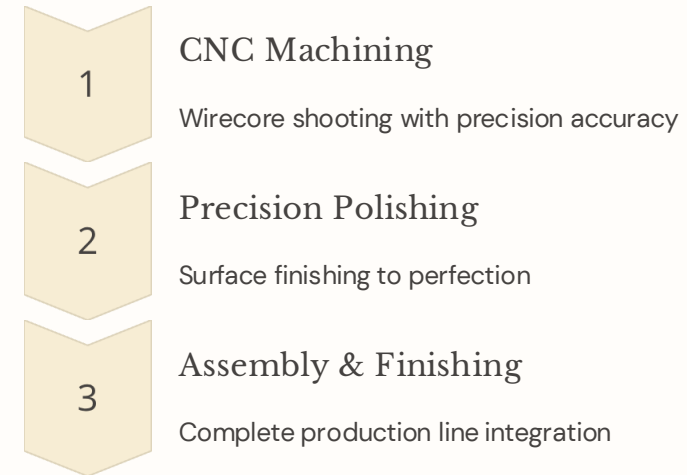

Full Manufacturing Capabilities

Acetate Manufacturing Expertise

Specializing in high-quality acetate eyewear with a commitment to excellence at every stage.

- CNC machining for precision cutting
- Multi-layer lamination techniques
- Advanced precision polishing
- Electroplating applications when required

Precision Manufacturing Process

Quality Assurance

Every Frame Meets the Highest Standards

100% Pre-Shipment Inspection

Every frame undergoes comprehensive quality verification before leaving our facility.

Comprehensive In-House Testing

- Durability and structural strength analysis
- Fit and comfort optimization
- Finish and surface quality verification

Zero-Defect Commitment

Our quality philosophy ensures consistent delivery of products that exceed industry standards and client expectations.

Why Partner With Us

Your Vision, Our Capability

1

Complete Manufacturing Solution

One-stop solution from initial design concepts through final delivery, streamlining your supply chain and reducing complexity.

2

Risk Mitigation Strategy

Dual production centers in China and Thailand reduce supply risk and tariff exposure, ensuring business continuity in volatile trade environments.

3

Dedicated Partnership Approach

Personalized account management and specialized engineering support for every project, ensuring your specific requirements are met with precision.

4

Proven Reliability

Consistent track record of meeting deadlines and exceeding quality expectations, building long-term trust with global partners.

5

Scalable Production Flexibility

Flexible capacity to support both premium product categories and high-volume orders, adapting to your market demands and growth trajectory.

Ready to transform your eyewear manufacturing strategy? Partner with CIC for unparalleled quality, reliability, and strategic advantage in today's competitive marketplace.
